

Installing SAG10 on Windows 7

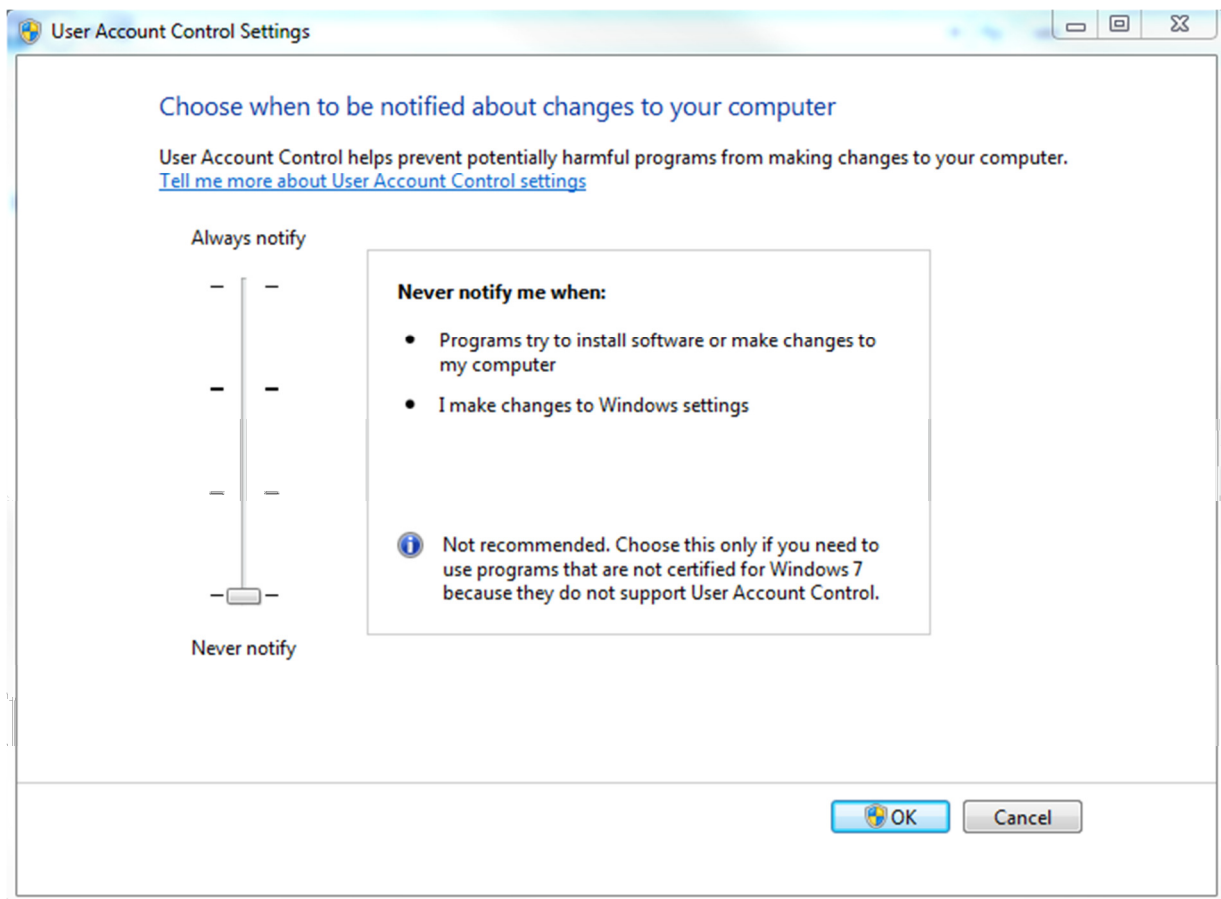

To install SAG10 on Windows 7 32-bit or 64-bit you will need administrative rights on the PC and you will have to turn off the User Account Control feature (UAC).

To disable the UAC follow these steps:

1. Open control panel on your PC.
2. In the Control Panel Search box type in uac.

3. Select Change User Account Control settings.
4. Slide the Slider to Never notify.

5. Click ok.

6. Restart your PC.

7. After you have rebooted you will be able to install SAG10 on Windows 7.

Note: the UAC must remain disabled for SAG10 to run correctly.
